

THE ONLY ALL-INCLUSIVE ECG SOLUTION

Cardea SOLO™ ECG is an all-inclusive ambulatory cardiac monitoring system that combines wearable sensor technology with automated ECG data analysis and reporting software that your institution owns and controls.

Steps To SOLO

1 PATIENT APPLICATION
Place SOLO on patient and schedule follow-up visit in 7 days

2 ON DEMAND DATA
Insert the Electronics Module into the Smart Cable and in minutes, review ECG data and generate reports

3 CLINICAL DECISION-MAKING
Review, interpret, and take clinical action with complete and comprehensive patient ECG data

7 DAYS OR LESS TO DIAGNOSIS

Cardea SOLO Product Features

Single-use disposable Sensor, eliminates maintenance

Immediate report generation and access to full disclosure ECG data

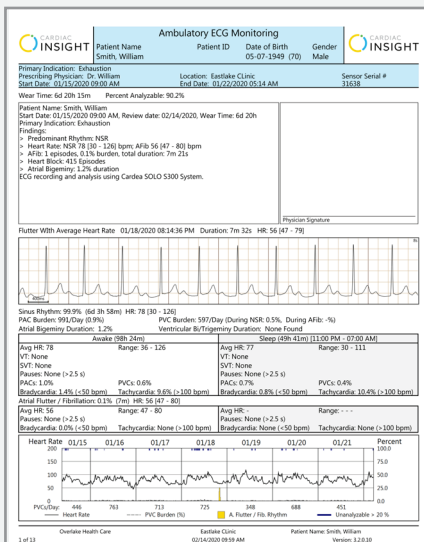

No outsourcing, no waiting, no delay in diagnosis

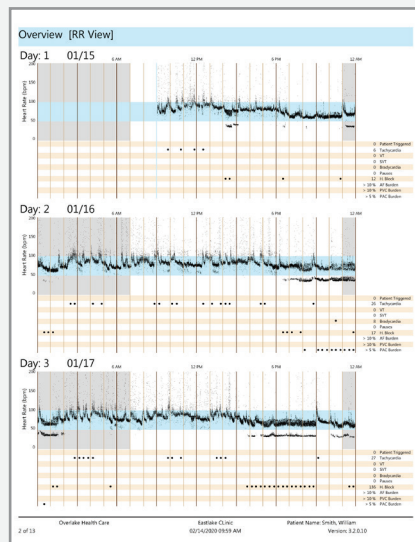

Get Simple. Get Smart. Get SOLO.

In-Clinic Arrhythmia Analysis

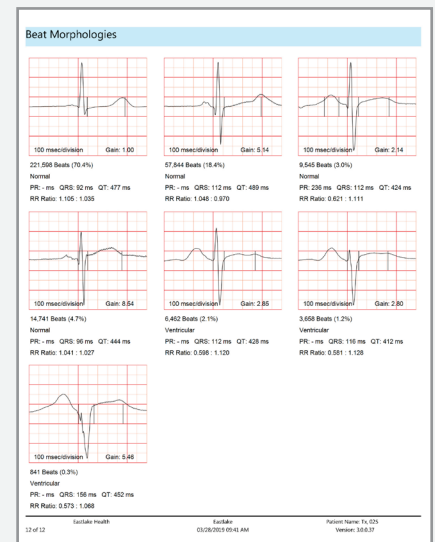

Cardea SOLO™ streamlines the arrhythmia diagnostic process by eliminating expensive and time consuming third party service providers, and equipment maintenance.

Detailed annotation, including patient triggered events, and paperless diagnostic confirmation

Rhythm Signatures™ allows rapid identification of important rhythms and diagnostic findings

Beat morphologies for each identified beat class
